EDUCATION

2016-2020

UNIVERSITY OF NORTH DAKOTA

- B.S. Computer Science
- B.A. Mathematics

SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, C#, Java, SQL, Python
- **Frontend Development:** React, Redux, HTML5, CSS3/SCSS, Responsive Design, Accessibility (WCAG)
- **Backend Development:** Node.js, Express.js, .NET Core, REST API design, Authentication & Authorization
- **Databases:** PostgreSQL, SQL Server, MySQL, SQLite, MongoDB
- **Cloud & DevOps:** AWS (EC2, S3, ElasticSearch, Lambda), Docker, Git/GitHub, CI/CD pipelines, Splunk, DataDog
- **Software Development Practices:** Agile/Scrum, Cross-functional team collaboration, Technical Documentation, Mentorship, Stakeholder Communication

ANDREW PESALL

SENIOR SOFTWARE ENGINEER

PROFILE

Senior Software Engineer with 6+ years of experience in full-stack development, API design, and cloud engineering. Proficient in React, JavaScript/TypeScript, Node.js, C#, .NET, and Java, with strong expertise in PostgreSQL, SQL Server, MySQL, and MongoDB. Experienced in deploying secure and scalable solutions on AWS and optimizing CI/CD pipelines to improve developer productivity. Strong communicator with a track record of delivering mission-critical applications in Agile environments.

WORK EXPERIENCE

INNOVIM

2022 - PRESENT

Software Engineer III
Deputy Program Manager

- **Frontend React Development:** Delivered new features and optimized backend/API performance for NASA's flagship data access tool, improving usability and system stability.
- **Independent Application Design & Delivery:** Independently designed and deployed a full-stack web app (React, Node.js, PostgreSQL) that replaced manual report collection, with role-based access control, project/user management, and audit tracking.
- **API Development:** Developed backend services and REST APIs using C#/.NET, with emphasis on performance, security, and scalability.
- **DevOps:** Implemented structured error logging to Splunk via AWS Lambda, improving error detection and root-cause analysis of production issues, as well as better tracking of user behavior.

Ameriprise Financial

2020 - 2022

Software Engineer

- **Automation:** Reduced team workload by 100+ hours per month by building automated deployment scripts using Ansible.
- **API Development:** Designed and deployed a secure and scalable C#/.NET API.
- **Performance Improvements:** Migrated full-text search from DB scans to AWS OpenSearch, indexing analyst reports and rewiring our C#/.NET APIs; resulting in ~70% faster response times and improved result relevance.
- **Data Analytics:** Developed dashboards and back-end logic to process and visualize enterprise data.

Ameriprise Financial

2019 - 2020

Software Engineer Intern

- **Full-Stack Development:** Developed full-stack web application features to analyze and correct financial data, enhancing accuracy and efficiency.
- **UI/Frontend:** Built responsive UI components using HTML, CSS, and JavaScript.
- **Backend & Database:** Implemented backend services with Java Servlets and SQL database interactions.
- **Team Leadership:** Collaborated with stakeholders to present technical solutions, demonstrating leadership, problem-solving, and communication skills.
